EXECUTIVE SUMMARY

Pennoni Associates, Inc. (Pennoni) has prepared this *Preliminary Assessment (PA) Report* for **Clarke Caton Hintz (Client)** in general conformance with the scope and limitations of the New Jersey Department of Environmental Protection's (NJDEP's) *Technical Requirements for Site Remediation (TRSR)* (N.J.A.C. 7:26E) as well as the Green Acres Program (N.J.A.C. 7:36). The primary objective of this PA was to identify Areas of Concerns (AOCs) associated with the Subject Property. Pursuant to the TRSR, an area of concern (AOC) is defined as any location where any hazardous substance, hazardous waste, or pollutant is known or suspected to have been discharged, generated, manufactured, refined, transported, stored, handled, treated, or disposed, or where any hazardous substance, hazardous waste, or pollutant has or may have migrated. This PA has been prepared to document investigations pertaining to the Belmont Avenue Park Plaza located at 2477 Kennedy Boulevard, City of Jersey City, Hudson County, New Jersey. The property is identified as Block 17601, Lot 19 on the City of Jersey City's Tax Map, which is included as Figure 1 in Appendix A, and is referenced hereinafter as the "Subject Property" or "Site." The Subject Property encompasses approximately 7.24 acres that is utilized as a park and developed with two gazebo structures, a statue, concrete sidewalks, a roadway, and landscaped vegetated land.

Based on historical property use, government agencies' records review, property observations, and adjoining property usage, Pennoni identified three AOCs in connection with the Subject Property:

After review of this report, Pennoni offers the following conclusions:

- **AOC-1: Historic Fill:** A review of the United States Department of Agriculture – Natural Resources Conservation Service (USDA-NRCS) Web Soil Survey revealed the soil present on the Subject Property consists primarily of Web Soil Survey revealed the soil present on the Subject Property consists of Greenbelt loam (GtbB) and Urban land, eolian substratum (UREOLB). GtbB is comprised of loamy human-transported material, while UREOLB is comprised of asphalt over human-transported material. In addition, a review of EDR's Historical Topographic Maps revealed a change in slope intensity between the years 1947 and 1955, with a more prominent slope downward to the northwest observed for the years 1955 to 2019; therefore, indicating the historical occurrence of potential excavation activities at the Site, including soil removal activities. Even though a change in slope intensity was observed, an increase in elevation was not noted from the Historical Topographic Maps. Due to the heterogenous nature and unknown origin of urban historic fill, it is possible that it may contain concentrations of contaminants above applicable regulatory standards. Further investigation is warranted.
- **AOC-2: Former Site Structures**
    - **AOC-2A: Former Historic Residential Structures:** Review of EDR's Certified Fire Insurance Sanborn maps revealed the presence of several former structures throughout the Site from 1896 to 1911. No evidence of any industrial/commercial operations at the Site was ascertained; however, the presence of former Site structures and absence of information regarding historical heating or waste water disposal at the Site constitutes an AOC. Further investigation is warranted.
    - **AOC-2B: Former Restroom Structures:** Per Mr. Kevin Wong, Deputy Director of Hudson County Parks, two restroom structures were formerly present on the Site; however, they were demolished and filled with soil prior to 1990. According to the comfort station plans provided by Mr. Wong, two restrooms were formerly present underneath each pavilion. The restrooms were

shown to have been connected to the existing sewer lines. During Pennoni's site reconnaissance, evidence of a former structure was observed adjacent to the northern pavilion. No further investigation is recommended.

- **AOC-3: Adjacent Sites**
  - **AOC-3A: Historical Dry Cleaner:** A review of EDR's database report revealed the presence of, Spiffy Dry Cleaners, which was identified in the EDR HIS CLEANER database as a dry-cleaning plant for the years 2009 and 2010. Based on the information provided by EDR, the facility is located 212 feet east-southeast of the Subject Property at relatively higher elevation. Due to the nature of historical activities as a dry cleaner, lack of environmental investigations, and the location, the potential for impacts to the subject property exists. Further investigation is warranted.
  - **AOC-3B: Unresolved UHOT Case:** 81 Gifford Avenue, Jersey City, New Jersey was identified as an active Known Contaminated Site with a PI # 568504. Per Dataminer Online Site, one unregulated heating oil UST was removed from the site and a release was reported and a remedial action report was submitted to the NJDEP on December 16, 2011. The status of the case is listed as "Administratively Deficient". Based on a review of the available documentation, the regulatory status of the site and the location, the potential for impacts to the subject property is a concern. Further investigation is warranted.

1.0 INTRODUCTION

On behalf of **Clarke Caton Hintz (Client), Pennoni** has prepared this *Preliminary Assessment (PA)* in general conformance with the scope and limitations of the New Jersey Department of Environmental Protection's (NJDEP's) *Technical Requirements for Site Remediation (TRSR)* (N.J.A.C. 7:26E) as well as the Green Acres Program (N.J.A.C. 7:36) to document investigations pertaining to the Belmont Avenue Plaza Park located at 2477 Kennedy Boulevard, City of Jersey City, Hudson County, New Jersey. The property is identified as Block 17601, Lot 19 on the City of Jersey City's Tax Map, which is included as Figure 1 in Appendix A, and is referenced hereinafter as the "Subject Property" or "Site."

1.1 Purpose

The purpose of the PA was to identify any Areas of Concerns (AOCs) as defined by N.J.A.C. 7:26E, associated with the Subject Property. An AOC as any existing or former distinct location or environmental medium where any hazardous substance, hazardous waste, or pollutant is known or suspected to have been discharged, generated, manufactured, refined, transported, stored, handled, treated, or disposed, or where any hazardous substance, hazardous waste, or pollutant has or may have migrated.

This PA does not include any testing or sampling of materials (e.g., soil, water, air, building materials).

1.2 Detailed Scope of Services

The findings, opinions, and conclusions of the environmental professional/Licensed Site Remediation Professional (LSRP) responsible for the preparation of this PA are based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. The scope of Pennoni's PA is summarized below:

1. Pennoni obtained and reviewed a database report that included standard environmental record sources and provided listings of facilities and operations with reported or potential environmental concerns within a specified distance from the Subject Property;
2. Pennoni requested files from the USEPA, NJDEP, Hudson County and the City of Jersey City;
3. Pennoni reviewed historical aerial photographs, historical insurance maps, deed records, and MacRae's Blue Book to the extent these sources were reasonably available. The review focused on the Subject Property;
4. Pennoni performed a site reconnaissance June 9, 2022, to physically observe the Subject Property and to obtain information indicating the likelihood of identifying any AOCs associated with the Subject Property.
5. Pennoni prepared this PA report of findings including documentation to support analysis, opinions and conclusions.

1.3 General Information

The Site is located on Block 17601, Lot 19. The Subject Property is currently developed as a park that is developed with two gazebo structures, a statue, concrete sidewalks, a roadway, and landscaped vegetated land. The Site is depicted on a portion of the Jersey City, New Jersey United States Geologic Survey (U.S.G.S.) 7.5-minute Topographic Quadrangle, which is included as Figure 2 in Appendix A. General site features are shown on Figure

3 in Appendix A.

2.0 SUBJECT PROPERTY DESCRIPTION

The following paragraphs provide a description of the Subject Property including its location, general characteristics, and current use. Current uses of adjoining properties and properties in the surrounding area are also described below.

2.1 Property Location and Legal Description

The Subject Property is located on the United States Geological Survey (USGS) 7.5-minute topographic quadrangle for Jersey City, New Jersey. The center of the Subject Property is located at the coordinates 40° 43' 22.97" North latitude and 74° 4' 38.15" West longitude. The location of the Subject Property is depicted on Figure 2 —Topo Location Map, which is included in Appendix A of this report.

The Subject Property consists of tax Block 17601, Lot 19 totaling approximately 7.24 acres that is utilized as a park and developed with two pavilion structures, a memorial statue, concrete sidewalks, a roadway, and landscaped vegetated land. Historically, the Site has been identified as a park since 1911, per the EDR Fire Insurance Sanborn maps.

2.2 Subject Property Characteristics

The following paragraphs describe the general characteristics of the Subject Property, including its current use and a description of structures, roads, and other improvements (i.e., heating/cooling system, sewage disposal, source of potable water, etc.).

2.1.1 Current and Past Use of the Subject Property

The Subject Property is currently used a public park and improved with two pavilion structures. The remainder of the Site is developed with two sidewalks, a roadway dissecting the Site, a memorial statue, and landscaped vegetated land. Historically, the Site has been identified as a park since 1911, with usage prior to 1911 identified as residential, per the EDR Fire Insurance Sanborn maps.

2.1.2 Site Structures/Improvements

The Site is improved with two pavilion structures, one on each side of the roadway dissecting the Site. The remains of a former structure is present adjacent to the pavilion located on the north end. Per Mr. Kevin Wong, Deputy Director of Hudson County Parks, two restroom structures were formerly present on the Site. Prior to 1990, the restrooms were demolished and filled with soil. According to the comfort station plans provided by Mr. Wong, two restrooms were formerly present underneath each pavilion. The restrooms were shown to have been connected to the existing sewer lines. The remainder of the Site is covered by a paved roadway, concrete sidewalks, a memorial statue, and landscaped vegetated areas.

2.1.3 Site Utilities

Electric and natural gas services are provided by Public Service Electric and Gas Company (PSEG).

2.3 Current Use of Adjoining Properties and Properties in the Surrounding Area

The area surrounding the Site consists of low-rise residential properties and a public park. Table 1 below provides details on surrounding property usage adjacent to the Site.

TABLE 1: SURROUNDING PROPERTY USES	
Northwest	West Side Avenue followed by a public park (Lincoln Park).
Northeast	Residential properties and a school.
Southwest	Residential properties.
Southeast	John F. Kennedy Boulevard followed by residential properties

3.0 PHYSICAL SETTING

3.1 Topography/Regional Drainage

The Subject Property is located on the Jersey City, New Jersey 7.5-minute USGS topographic quadrangles at an approximate elevation of 77 feet above mean sea level (MSL). The Site generally slopes down to the northwest. Surface and storm water from the developed areas on the Subject Property are expected to drain into storm water grates located on the Subject Property and along the roadway. Percolation directly into the groundwater table is expected in the undeveloped areas. Regionally, the area is drained into the Hackensack River, which is located downgradient, approximately 0.95 miles west of the Site.

3.2 Soils

A review of the United States Department of Agriculture – Natural Resources Conservation Service (USDA-NRCS) Web Soil Survey revealed the soil present on the Subject Property consists of Greenbelt loam with 3 to 8 percent slopes (GtbB) and Urban land, eolian substratum with 0 to 8 percent slopes (UREOLB).

GtbB is a well-drained soil that is comprised of loamy human-transported material, while UREOLB is comprised of asphalt over human-transported material.

A review of the NJDEP's NJ-Geoweb did not identify any mapped historic fill on the Site or its adjacent sites; however, due to the main soil composition of the Site identified as human-transported material, fill material may be present on the Site. In addition, a review of EDR's Historical Topographic Maps revealed a change in slope intensity between the years 1947 and 1955, with a more prominent slope downward to the northwest observed for the years 1955 to 2019; therefore, indicating the historical occurrence of potential excavation activities at the Site, including soil removal activities. Due to the heterogenous nature and unknown origin of urban historic fill, it is possible that it may contain concentrations of contaminants above applicable regulatory standards.

No localized borings were completed during this investigation; therefore, no Site-specific soil data was available.

The potential presence of historic fill is considered an AOC.

3.3 Underlying Geology

Based on the New Jersey Geological Survey (NJGS)'s *Physiographic Provinces of New Jersey*, the Site lies within the Piedmont Physiographic Province. The Piedmont consists of large low, rolling plains separated by a series of high ridges that stretch from the Delaware River across to the northeastern New Jersey/New York border. It is underlain by slightly folded and faulted sedimentary rocks that date back to the Triassic and Jurassic ages as well as igneous rocks of the Jurassic age.

Based on the Geologic Map of New Jersey and NJ-GeoWeb, the underlying formation is determined to be Jurassic Diabase (Jd). Jd generally consists of fine-grained to aphanitic dikes; medium- to coarse-grained, subophitic discordant stock-like intrusions of dark-greenish-gray to black diabase with a maximum thickness of 400 meters.

3.4 Groundwater

The Subject Property is underlain by the Diabase Aquifer (db). The db is described as fresh, slightly to highly alkaline, moderately hard and of the calcium-bicarbonate type, with groundwater stored and transmitted in fractures. A formal groundwater flow direction study has not been conducted as part of this ESA. Groundwater flow direction is likely influenced by subsurface utilities, local dewatering projects, bedrock topography, former

surface water features and other subsurface features.

3.5 Water Mitigation Pathways

Potential migratory pathways for surface water and groundwater entering and exiting the Subject Property is important in establishing the potential for surrounding areas to impact the Subject Property or for the Subject Property to impact neighboring properties that are downgradient. Local topography slopes to the northwest; therefore, surface water and groundwater are expected to migrate from the properties located to the southeast.

3.6 Wetlands

A review of the United States Fish and Wildlife Service's (USFWS's) Online Wetland Mapper and the NJDEP's GeoWeb mapping software did not identify any classified wetlands on the Subject Property or adjoining properties.

4.0 HISTORICAL RECORDS

The purpose of consulting historical records is to develop a history of the previous uses of the Subject Property and surrounding area to help identify the likelihood of past uses having led to AOCs in connection with the Subject Property.

4.1 Historic Aerial Photographs

Pennoni reviewed EDR Aerial Photo Decade Package provided by Environmental Data Resources (EDR) of Shelton, Connecticut (Inquiry # 7012254.14). Aerial photographs were reviewed for the years 1940, 1943, 1951, 1954, 1961, 1966, 1974, 1976, 1985, 1991, 1995, 2006, 2010, 2013 and 2017 with a 1930 aerial photograph of the Site reviewed on NJDEP's NJ-Geoweb. Copies of the Aerial Photo Decade Package reviewed by Pennoni are included in Appendix B. Table 2 is a summary of the aerial photographs reviewed:

TABLE 2: AERIAL PHOTOGRAPHS	
Date	**Description**
1930 to 1954	Site: The Site appears to be developed with a roadway dissecting the Site, and two sidewalks and two structures located on either end of the roadway. A third structure is present on the east end of the Site. The Site resembles the current conditions and composition of the Site.
	Surrounding Area: The surrounding areas to the north, east and south of the Site are developed with residential properties. A park is present to the west of the Site.
1961	Site: No significant changes to the Site were noted from the 1954 aerial photograph.
	Surrounding Area: The surrounding area to the north of the Site has been further developed with residential structures. No other significant changes to the surrounding area were noted from the 1954 aerial photograph.
1966 to 2017	Site: No significant changes to the Site were noted from the 1961 aerial photograph.
	Surrounding Area: No significant changes were observed to the surrounding area from 1961 aerial photograph.

Review of the historical aerial photographs demonstrates that the composition of the Subject Property appears to have remained consistent since 1930.

Copies of the aerial photographs are included as Appendix B.

4.2 Historical Sanborn® Fire Insurance Maps

As part of the background search, Pennoni requested historical Certified Sanborn Fire Insurance Maps as part of the EDR report (Inquiry # 7012254.3). The maps were reviewed to determine past uses and conditions of the Subject Property. The available maps were reviewed for the years 1896, 1911, 1951, 1979, 1988, 1990, 1993, 1994, 1995, 1999, 2001, 2002, 2003, 2005, and 2006. Table 3 is a brief narrative of the historical map review:

TABLE 3: CERTIFIED SANBORN FIRE INSURANCE MAPS	
Date	**Description**
1896	Site: The Site is comprised of various lots with Belmont Avenue dissecting the Site. Five small dwelling structures are present on the southern side of Belmont Avenue. Eighteen small residential structures are present on the northeastern side of Belmont Avenue.
	Surrounding Area: The surrounding area is developed with several dwelling structures to the north, east, and south of the Site.

TABLE 3: CERTIFIED SANBORN FIRE INSURANCE MAPS (cont.)	
Date	**Description**
1911	Site: The Site is longer divided into several lots but is comprised of a single lot resembling the current block and lot. The Site is identified as West Side Park. The 24 small dwelling structures are no longer present. Two new structures are now present on either side of Belmont Avenue. Belmont Avenue is now observed to be divided into two street paths on its southeastern end. The Site resembles the current Site composition.
	Surrounding Area: The surrounding area has been further developed with residential structures.
1951	Site: The two structures on the Site are identified as pavilions. No other changes to the Site were noted from the 1911 Sanborn map.
	Surrounding Area: The surrounding area has been further developed with residential structures.
1979-2006	Site: The Site is now identified as Lincoln Park. No other changes to the Site were noted from the 1951 Sanborn map.
	Surrounding Area: No significant changes to the surrounding areas were noted from the 1951 Sanborn map.

Based on the review of the historical Sanborn Fire insurance maps, 24 former structures were present on the Site from 1896 to 1911. From 1911 until present, the Site composition has remained the same.

Copies of the historical Sanborn maps reviewed by Pennoni are included in Appendix B.

4.3 Local Street Directories

As part of the background search, Pennoni requested an historical City Directory Image Report as part of the EDR report (Inquiry # 7012254.13). Local street directories showing ownership and/or use of the Subject Property and surrounding properties by use of street address were reviewed. A review of the EDR City Directory did not identify the Subject Property in any directory. A copy of the City Directory Report reviewed by Pennoni is included in Appendix B.

Per *njtaxmaps.com*, the Site is currently owned by the Hudson County Park Commission. No other information was provided.

A copy of a tax information for the Subject Property is included is included in Appendix C.

4.4 MacRAE's Industrial Directory

As part of the background search, Pennoni requested historical NJ MacRAE'S Industrial Directory Report as part of the EDR report (Inquiry # 7012254.7). A review of the EDR NJ MacRAE's Industrial Directory Report did not identify any listings for the Subject Property. A copy of the NJ MacRAE'S Industrial Directory Report reviewed by Pennoni is included in Appendix B.

4.5 Chain of Title

As part of the background search, Pennoni requested an historical EDR 1932 Chain of Title as part of the EDR report (Inquiry # 7012254.6S). The EDR Chain of the Title Report tracks the line of successive owners from the present back to 1932 of a particular parcel. A review of the EDR Chain of Title identified the current owner of the Site as Hudson County Park Commission. Public records of Passaic County, New Jersey were searched from January 1, 1932, to January 12, 2022, and no other deeds vesting title were found of records during the period searched.

A copy of the EDR 1932 Chain of Title Report reviewed by Pennoni is included in Appendix B.

4.6 Property Tax Files

Pennoni obtained the current tax map for the Subject Property from *njtaxmaps.com*. A copy of a tax parcel map depicting the Subject Property is included as Figure 1—Tax Map, which is included in Appendix A.

4.7 Recorded Land Title Records

As part of the background search, Pennoni requested Recorded land title records including records of historical fee ownership, including leases, land contracts and Activity and Use Limitations (AULs on or of the Subject Property. Pennoni reviewed EDR's Environmental Lien and AUL Search report (Inquiry # 7012254.5). Per the report, no environmental liens or AULs were identified in association with the Subject Property. A copy of the EDR Environmental Lien and AUL Search report reviewed by Pennoni is included in Appendix B.

4.8 Building Department Records

Pennoni submitted an OPRA Request Form with the City of Jersey City (via electronic mail/facsimile) on June 9, 2022, for information regarding environmental concerns at the Subject Property. Pennoni received a response from the City of Jersey City's Clerk via electronic mail indicating that no records were available for the Site.

Copies of records requests are provided in Appendix C.

Additionally, as part of their background search, Pennoni requested an EDR Building Permit Report (Inquiry # 7012254.9). No building permits were identified in the EDR Building Permit Report for the Subject Property. A copy of the EDR Building Permit Report included in Appendix B.

4.9 Zoning/Land Use Records

Per *njtaxmaps.com,* the Subject Property is zoned Class: 15C – Public.

Copies of documentation obtained from the NJ Tax Map website (https://njtaxmaps.com/) by Pennoni are included in Appendix C.

4.10 Previous Environmental Reports

No environmental reports were provided to Pennoni for review.

4.11 Hazardous Substance/Waste Inventory

In accordance with N.J.A.C. 7:26E-3.1(c)1.iii, raw materials, finished products, formulations and hazardous substances, hazardous wastes, hazardous constituents, and pollutants, including intermediates and by-products that are or were historically present on the Site must be listed, if applicable. No evidence of hazardous substances was observed on the Site during the site inspection. Review of available information yields no indication that hazardous substances were used, process, and/or stored on the Site during its operational history.

4.12 Wastewater Discharge History / Process Waste Stream

Per Mr. Kevin Wong, Deputy Director of Hudson County Parks, two restroom structures were formerly present on the Site; however, they were demolished and filled with soil prior to 1990. According to the comfort station plans provided by Mr. Wong, two restrooms were formerly present underneath each pavilion. The restrooms were shown to have been connected to the existing sewer lines. During Pennoni's site reconnaissance, evidence of a former structure was observed adjacent to the northern pavilion.

4.13 Radioactive Materials

No radioactive material was observed on the Site during the site inspection. Review of available information yields no indication that radioactive materials were used, process, and/or stored on the Site during its operational history.

4.14 Discharge History

Review of available information did not identify any releases associated with the Site.

4.15 Environmental Permits

The Subject Property has not been identified with any environmental permits.

4.16 Summary of Enforcement Actions

The Subject Property has not been identified with any violations.

4.17 Fill

By NJDEP definition, "Historic fill material means non-indigenous material, deposited to raise the topographic elevation of the site, which was contaminated prior to emplacement, and is in no way connected with the operations at the location of emplacement and which includes, without limitation, construction debris, dredge spoils, incinerator residue, demolition debris, fly ash, or non-hazardous solid waste. Historic fill material does not include any material which is substantially chromate chemical production waste or any other chemical production waste or waste from processing of metal or mineral ores, residues, slag or tailings. In addition, historic fill material does not include a municipal solid waste landfill site" (N.J.A.C. 7:26E-1.8).

A review of the NJDEP's NJ-Geoweb did not identify any mapped historic fill on the Site or its adjacent sites; however, due to the main soil composition of the Site identified as having human-transported material, fill material may be present on the Site; however, no localized borings were completed during this investigation; therefore, no Site-specific soil data was available.

Furthermore, Pennoni reviewed available historical topographic maps, provided by EDR, for the years 1891, 1898, 1900, 1905, 1925, 1947, 1955, 1967, 1981, 1995, 2014, 2016, and 2019. A slight, gentle downward slope to the northwest was observed from the years 1891 to 1947; however, a significant change in slope intensity was observed from 1947 to 1955 with a more prominent downward slope to the northwest observed for the years 1955 to 2019; therefore, indicating the historical occurrence of potential excavation activities at the Site. Even though a change in slope intensity was observed, no increase in elevation was noted from the historical topographic maps.

Copies of the historic topographic maps can be found in Appendix B.

4.18 Waste Disposal Areas

Several municipal trash bins were observed throughout the Site during the site inspection. No significant staining was observed in the vicinity of the trash bins.

5.0 REGULATORY RECORDS

As part of this PA, Pennoni reviewed both standard and additional environmental record sources for the Subject Property and surrounding area. Our environmental records review consisted of a review of the following records, when available:

- the EDR Radius Map Report (EDR Report) for the Subject Property; and,
- information requested from the USEPA, NJDEP, Hudson County, and City of Jersey City.

5.1 Standard Environmental Record Sources, Federal and State

Pennoni contracted the services of EDR to search both state and federal environmental databases to identify potential concerns that may be associated with either the Subject Property and/or surrounding sites. EDR Report # 7012254.2s provided listings, accompanied by a map, of facilities and operations with reported environmental concerns within a specified search radius around the Subject Property. Table 5 tabulates the search result with at least one environmental database entry.

TABLE 5: ENVIRONMENTAL DATABASE LISTINGS

Database	Site	<1/8 mile	1/8-1/4 mile	1/4-1/2 mile	1/2-1 mile	Total

NJ MANIFEST	0	0	2	NR	NR	2
EDR HIST CLEANER	0	3	NR	NR	NR	3

Complete listings and descriptions of the each of the database searches are included in the EDR Report. A summary of the report results is provided in the following subsections. A copy of the EDR Report is included in Appendix B.

5.0.1 Subject Property Database Listings

The Subject Property was not identified in the EDR databases.

A cursory review of the NJDEP's Dataminer online database and NJ-GEOWeb did not identify the site.

5.0.2 Vicinity Properties - Facilities of Potential Concern

The EDR Report identified multiple facilities located adjacent to or near the subject property. The listed sites were reviewed for releases, distance and direction from the subject property and potential impacts to the subject property. Immediately adjacent sites of concern include:

The EDR Report identified the following regulated facilities:

- **Academy of St Aloysuis - 2495 Kennedy Boulevard, Jersey City, New Jersey:** The facility is located 64 feet east-southeast of the Subject Property at relatively higher elevation. Per the EDR Report the facility has been identified in the following database:
    - **Underground Storage Tank (UST):** The facility was identified with Facility ID #018281 for one 10,000-gallon No. 2 Heating Oil UST. The tank was listed as abandoned in place on February 28, 1997.

  A review of the NJDEP's Dataminer Online Site for PI # 018281 identified the site with a closure notification C97-0019 for the closure of a UST that was issued a letter of "No Further Action" (NFA) on May 6, 1997.

  Based on a review of the available documentation, the regulatory status of the site and the location, the potential for impacts to the subject property is not a concern.

- **Gifford Towers - 2465 Kennedy Boulevard, Jersey City, New Jersey:** The facility is located 70 feet south-southeast of the Subject Property at relatively higher elevation. Per the EDR Report the facility has been identified in the following database:
    - **UST:** The facility was identified with Facility ID #020332 for one 5,000-gallon No. 2 Heating Oil UST. The tank was listed as removed on January 1, 1951.

  A review of the NJDEP's Dataminer Online Site for PI # 020332 confirmed the UST was listed as removed.

  Based on a review of the available documentation, the regulatory status of the site and the location, the potential for impacts to the subject property is not a concern.

- **Sunny Towers - 2500 Kennedy Boulevard, Jersey City, New Jersey:** The facility is located 116 feet east of the Subject Property at relatively higher elevation. Per the EDR Report the facility has been identified in the following database:
    - **UST:** The facility was identified with Facility ID #017030 for one 5,000-gallon No. 4 Heating Oil UST. The tank was listed as removed on January 1, 1989.

  A review of the NJDEP's Dataminer Online Site for PI # 017030 confirmed the UST was listed as removed.

  Based on a review of the available documentation, the regulatory status of the site and the location, the potential for impacts to the subject property is not a concern.

- **81 Gifford Avenue, Jersey City, New Jersey:** The facility is located 164 feet south-southeast of the

Subject Property at relatively higher elevation. Per the EDR Report the facility has been identified in the following database:

- **Known Contaminated Sites in New Jersey (SHWS):** The facility was identified with a Site ID 451989 and Program Interest (PI) #568504 with a status listed as Active.

A review of the NJDEP's Dataminer Online Site for PI # 568504 identified the site as a SRP site. Based on the Dataminer review, one unregulated heating oil UST was removed from the site and a release was reported. A remedial action report was submitted to the NJDEP on December 16, 2011. The status of the case is listed as "Administratively Deficient". No other information regarding this site was present.

Based on a review of the available documentation, the regulatory status of the site and the location, the potential for impacts to the subject property is a concern.

- **Kensington Apartments – 88-90 Kensington Avenue, Jersey City, New Jersey:** The facility is located 167 feet east-northeast of the Subject Property at relatively higher elevation. Per the EDR Report the facility has been identified in the following database:
  - **Voluntary Cleanup Program (VCP):** The facility was identified with an Incident #03-03-19-1204-52 for a historical VCP file and a Memorandum of Agreement (MOA) executed on June 23, 2005.
  - **SHWS:** The facility was identified with a Site ID 51630 and PI #017366 with a status listed as Closed.
  - **UST:** The facility was identified with Facility ID #017366 for one 3,000-gallon No. 2 Heating Oil UST. The tank was listed as removed on January 1, 1964.
  - **New Jersey Environmental Management System (NJEMS):** The facility was identified with a Site ID 460428. No other information was available.
  - **Aerometric Information Retrieval System (AIRS):** The facility was identified with Facility #13184 and active #GEN120001 for a boiler < 5 million metric British thermal units (MMBTU)/hour general permit (GP-017) listed as auto-killed.

  A review of the NJDEP's Dataminer Online Site for PI # 769077 identified the site with an SRP # 03-03-19-1204-52 for the closure of a regulated UST. The case was closed with a NFA on August 2, 2005. Furthermore, the UST registration was listed as Terminated on June 17, 1999.

  Based on a review of the available documentation, the regulatory status of the site and the location, the potential for impacts to the subject property is not a concern.

- **86 Kensington Avenue, Jersey City, New Jersey:** The facility is located 167 feet east-northeast of the Subject Property at relatively higher elevation. Per the EDR Report the facility has been identified in the following database:
  - **SHWS:** The facility was identified with a Site ID 610216 and PI #769077 with a status listed as Closed.
  - **NJEMS:** The facility was identified with a Site ID 610216. No other information was available.

- **NJ RELEASE:** The facility was identified with Case # 17-10-19-1524-31 for an UST-related incident that occurred on October 19, 2017. The incident status is listed as Terminated.

A review of the NJDEP's Dataminer Online Site for PI # 017366 identified the site as an unregulated heating oil UST (UHOT) site for a heating oil UST removed from the site. A release was reported and SRP # 17-10-19-1524-31 was issued. The case was closed with a NFA on January 3, 2018.

Based on a review of the available documentation, the regulatory status of the site and the location, the potential for impacts to the subject property is not a concern.

- **Spiffy Dry Cleaners - 188 Belmont Avenue 1C, Jersey City, New Jersey:** The facility is located 212 feet east-southeast of the Subject Property at relatively higher elevation. Per the EDR Report the facility has been identified in the following database:
  - EDR HIST CLEANER: The facility was identified as a dry-cleaning plants for the years 2009 and 2010.

A review of the NJDEP's Dataminer Online Site and NJ-GEOWeb did not identify any open or closed cases for this address or block and lot.

Due to the nature of historical activities as a dry cleaner and the location, the potential for impacts to the subject property exists.

5.0.3 Orphan Sites

The unfiltered EDR Report identified 211 orphan sites which could not be mapped due to inadequate address information.

5.1 Regulatory Agency Review of Site

5.2.1 United States Environmental Protection Agency

A request was submitted online to the USEPA, *MyPropertyInfo* website, on June 9, 2022, to search federal files for any information regarding the Subject Property, and any instances of illegal waste discharges, notices of violations, and the current regulatory status of the Subject Properties. The search did not identify the Site in databases searched.

Copies of records requests are provided in Appendix C.

5.2.2 New Jersey Department of Environmental Protection

Pennoni submitted an online Open Public Records Act (OPRA) inquiry on June 9, 2022, for access to government records requesting information on file regarding illegal waste discharges, underground and/or aboveground storage tanks, environmental contamination, and violations of environmental laws and/or permits for the Subject Property. Pennoni received a response from the NJDEP Office of the Records Custodian via electronic mail indicating that the NJDEP did not identify any responsive records for the Site.

Copies of records requests are provided in Appendix C.

5.1.3 Hudson County

Pennoni submitted an OPRA Request Form with Hudson County (via electronic mail/facsimile) on June 9, 2022, for information regarding environmental concerns at the Subject Property. No response has been received as of the date of this report.

Copies of records are provided in Appendix C.

6.2.4 City of Jersey City

Pennoni submitted an OPRA Request Form with the City of Jersey City (via electronic mail/facsimile) on June 9, 2022, for information regarding environmental concerns at the Site. Pennoni received a response from the City of Jersey City's City Clerk via electronic mail indicating that no records were identified for the Site.

Copies of records requests are provided in Appendix C.

6.0 SITE RECONNAISSANCE

Pennoni personnel completed an inspection of the subject property on June 9, 2022, to visually inspect the property for evidence of AOCs. During the site visit, Antonella Mastropierro of Pennoni was unescorted. Photographs of the significant features observed during the site visit are provided in Appendix D.

Methodology

The property was observed by walking the Site. No interior areas were present on the Site. Exterior portions of the Subject Property were accessed with no limitations.

Limitations

The entire Site was accessed with no limitations.

6.1 Site Walk Findings

Table 9 identifies the findings identified during the site walk.

TABLE 6: SITE WALK FINDINGS		
AOCs	Currently Exists? ☒if "Yes"	Formerly Exists? ☒if "Yes"
Aboveground storage tank and associated piping	☐	☐
Area of stressed vegetation	☐	☐
Area which receives flood or storm water from potentially contaminated areas	☐	☐

7.0 INTERVIEWS

Pennoni provided a Site Contact Interview Questionnaire to the Client. On July 1, 2022, the questionnaire was completed and returned to Pennoni by Mr. Kevin Wong, Deputy Director of Parks. Per Mr. Wong, the Site was established as a park in the early 1900s. Mr. Wong was unaware of any environmental issues associated with the Site.

A Copy of the Site Contact Interview Questionnaire is included in Appendix C.

8.0 FINDINGS

Based on historical property use, government agencies' records review, property observations, and adjoining property usage, Pennoni has identified the following AOCs associated with the Subject Property:

- **AOC-1: Historic Fill**
- **AOC-2: Former Site Structures**
    - **AOC-2A: Former Historic Residential Structures**
    - **AOC-2B: Former Restroom Structures**
- **AOC-3: Adjacent Sites**
    - **AOC-3A: Historical Dry Cleaner**
    - **AOC-3B: Unresolved UHOT Case**

9.0 CONCLUSIONS

After review of this report, Pennoni offers the following conclusions:

- **AOC-1: Historic Fill:** A review of the United States Department of Agriculture – Natural Resources Conservation Service (USDA-NRCS) Web Soil Survey revealed the soil present on the Subject Property consists primarily of Web Soil Survey revealed the soil present on the Subject Property consists of Greenbelt loam (GtbB) and Urban land, eolian substratum (UREOLB). GtbB is comprised of loamy human-transported material, while UREOLB is comprised of asphalt over human-transported material. In addition, a review of EDR's Historical Topographic Maps revealed a change in slope intensity between the years 1947 and 1955, with a more prominent slope downward to the northwest observed for the years 1955 to 2019; therefore, indicating the historical occurrence of potential excavation activities at the Site, including soil removal activities. Even though a change in slope intensity was observed, an increase in elevation was not noted from the Historical Topographic Maps. Due to the heterogenous nature and unknown origin of urban historic fill, it is possible that it may contain concentrations of contaminants above applicable regulatory standards. Further investigation is warranted.
- **AOC-2: Former Site Structures**
    - **AOC-2A: Former Historic Residential Structures:** Review of EDR's Certified Fire Insurance Sanborn maps revealed the presence of several former structures throughout the Site from 1896 to 1911. No evidence of any industrial/commercial operations at the Site was ascertained; however, the presence of former Site structures and absence of information regarding historical heating or waste water disposal at the Site constitutes an AOC. Further investigation is warranted.
    - **AOC-2B: Former Restroom Structures:** Per Mr. Kevin Wong, Deputy Director of Hudson County Parks, two restroom structures were formerly present on the Site; however, they were demolished and filled with soil prior to 1990. According to the comfort station plans provided by Mr. Wong, two restrooms were formerly present underneath each pavilion. The restrooms were shown to have been connected to the existing sewer lines. During Pennoni's site reconnaissance, evidence of a former structure was observed adjacent to the northern pavilion. No further investigation is recommended.
- **AOC-3: Adjacent Sites**
    - **AOC-3A: Historical Dry Cleaner:** A review of EDR's database report revealed the presence of, Spiffy Dry Cleaners, which was identified in the EDR HIS CLEANER database as a dry-cleaning plant for the years 2009 and 2010. Based on the information provided by EDR, the facility is located 212 feet east-southeast of the Subject Property at relatively higher elevation. Due to the nature of historical activities as a dry cleaner, lack of environmental investigations, and the location, the potential for impacts to the subject property exists. Further investigation is warranted.
    - **AOC-3B: Unresolved UHOT Case:** 81 Gifford Avenue, Jersey City, New Jersey was identified as an active Known Contaminated Site with a PI # 568504. Per Dataminer Online Site, one unregulated heating oil UST was removed from the site and a release was reported and a remedial action report was submitted to the NJDEP on December 16, 2011. The status of the case is listed as

“Administratively Deficient”. Based on a review of the available documentation, the regulatory status of the site and the location, the potential for impacts to the subject property is a concern. Further investigation is warranted.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 04/27/2022 has revealed that there are 2 NPL sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Cerclis ID:: 200569				
EPA Id: NJD980505648				

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2022 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 02/28/2022 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 3 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

NJ SHWS: Known contaminated sites in New Jersey except those associated with Bureau of Underground Storage Sites (BUST)

A review of the NJ SHWS list, as provided by EDR, and dated 02/07/2022 has revealed that there are 994 NJ SHWS sites within approximately 1 mile of the target property.

NJ HWS RE-EVAL: The locations were removed from the Known Contaminated Sites list for a variety of reasons. Some of the sites were taken off the list because they were inactive, some were not assigned a case worker and some were no longer contaminated. Inspectors from the DEP are now undertaking a full re-evaluation of each of the locations statewide. That includes visual and environmental tests to see whether contamination still exists.

A review of the NJ HWS RE-EVAL list, as provided by EDR, and dated 09/20/2007 has revealed that there are 9 NJ HWS RE-EVAL sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal landfills and solid waste disposal facilities

NJ SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection & Energy's Solid Waste Facility Directory.

A review of the NJ SWF/LF list, as provided by EDR, and dated 08/16/2021 has revealed that there is 1 NJ SWF/LF site within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

NJ UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection & Energy's UST Data.

A review of the NJ UST list, as provided by EDR, and dated 12/07/2021 has revealed that there are 43 NJ UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/28/2022 has revealed that there are 16 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

NJ ISRA: The ISRA process begins with determining if the Act applies to your type of business and transaction. The provisions of ISRA only apply to industrial establishments. What is an industrial establishment? The term "industrial establishment" refers to the type of business operations and transactions that would subject a facility to review under ISRA. An industrial establishment must meet each of the following three criteria: The place of business or real property at which such business is conducted, having a North American Industry Classification System (NAICS) code listed in N.J.A.C. 7:26 B - Appendix C subject to

the specified exceptions and limitations. The place of business must have been engaged in operations on or after December 31, 1983; and The place of business must involve the generation, manufacture, refining, transportation, treatment, storage, handling, or disposal of hazardous substances or hazardous wastes.

A review of the NJ ISRA list, as provided by EDR, and dated 10/28/2021 has revealed that there are 3 NJ ISRA sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

DIAMOND ALKALI CO. (Continued) **1000301205**

Summary Details:

Conditions at listing September 1983): The Diamond Alkali Co. Site occupies about l acre immediately adjacent to the Passaic River, in Newark, Essex County, New Jersey. From 1943 through l968, the company manufactured numerous chemicals onthe site, including 2,4,5-trichlorophenol, which is likely to contain dioxin as an impurity. Extensive sampling conducted by EPA and the State has detected extremely high concentrations of dioxin on and off the site. EPA and the State have covered the area of major contamination with plastic tarpaulins. Adjacent transportation routes and residential areas were swept and vacuumed. Workers may have been exposed to dioxin during normal operations, as well as during renovations conducted during the summer of l982. Another company has since purchased the land. The area is both densely populated and heavily industriali ed. Municipal water is drawn from the Wanaque Reservoir, roughly 35 miles from the site. Status June 1984): On March 13, 1984, the State and Diamond entered into an Administrative Order on Consent for a remedial investigation/feasibility study and for on-site cleanup.

Summary Details:

Conditions at listing December 1982): The PJP Landfill covers about 50 acres near the Hackensack River in Jersey City, New Jersey. Much of the dump, now closed, is uncovered, and fires frequently flare up on the surface and underground. Volatile organics and other toxic substances have been detected in air, ground water, and run-off. Ground water is used by local industries. Surface waters in the area are used for commercial shipping and recreation. The property is adjacent toheavily populated residential areas. Status July 1983): The State is negotiating with the current owners of the site to undertake a study to define the nature and extent of contamination at the site.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS

BELL CHEVROLET (Continued) **1000273833**

CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F004
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Summary:

Waste Code: D000
Waste Description: Not Defined

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS

MAACO AUTO (Continued) **1000174835**

CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F004
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for

SUN CLEANERS (Continued) **1000107269**

information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
NJ-NJEMS (New Jersey - New Jersey Environmental Management System). The Department of Environmental Protection (NJDEP) manages large databases of environmental information in this integrated system.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
